Scope of Use

Timber Screws can be used in a variety of different application to fix components to a timber substrate.
Can be used for fastening wooden and thin steel plates to timber.

Limitations

If fastening thin metal plates to timber, a pilot hole is required in the metal.
Avoid overtightening of screw to minimise any surface damage.

Materials

Zinc Finish
Brass
Ruspert
Galvanised
Stainless Steel (G304 and G316)

Installation

It is the responsibility of the user to select the correct size and grade of fastener that will meet the requirements required for that particular installation and environment
Apply consistent firm pressure to screw driver ensuring the correct driver bit has been used.

Maintenance

Periodic inspection for corrosion recommended
